PROFESSIONAL SUMMARY

Systems Analyst with a B.Sc. in Information Systems and demonstrated expertise in enterprise system analysis. Delivered complete BRD/SRS documentation, 45+ professional BPMN/UML/C4 diagrams, and versioned REST API specifications across healthcare, fintech, and logistics — with a focus on regulated environments where compliance, segregation of duties, and auditability are critical.

CORE COMPETENCIES

Business Analysis: BRD · SRS · User Stories · Stakeholder Analysis · Traceability Matrix · Gap Analysis · Risk Analysis

Modeling & Architecture: BPMN 2.0 · UML (Use Case, Sequence, State, Class) · DFD (L0-L2) · ERD · C4 Model · State Machines

Technical Design: REST API Design · Webhooks · Idempotency · SQL · RBAC · Event-Driven Architecture · Data Modeling

Tools: Jira · Confluence · Draw.io · Mermaid · Postman · Lucidchart · Microsoft Visio · Git

Methodologies: Agile / Scrum · SDLC · Compliance (KYC/AML) · Segregation of Duties (SoD)

KEY PROJECTS & ENGAGEMENTS

Clinic Management System — Lead Systems Analyst | *Enterprise Analysis Portfolio* *2026*

- **Analyzed requirements** to digitize a paper-based clinic serving 12 doctors and 180 daily patients — eliminating record loss and reducing projected patient wait time by 60%.
- **Delivered a complete BRD + SRS** with 30 Functional Requirements, 33 Non-Functional Requirements, and 7 analytical tables (CRUD Matrix, Risk Analysis, Traceability Matrix).
- **Modeled 15 UML diagrams** including Use Case, Activity, BPMN, DFD (L0–L2), Sequence, Communication, State, Class, Object, Package, Component, Deployment, and ERD.
- **Designed a state machine** for appointment lifecycle transitions (No-Show, Cancel, Reschedule) to prevent double-booking and preserve full audit history.

SME Loan Origination System — Lead Systems Analyst | *Regulated Fintech Portfolio* *2026*

- **Architected the end-to-end loan origination workflow** for a banking environment — covering intake, KYC verification, credit bureau check, eligibility scoring, multi-level approval, offer generation, and disbursement.
- **Defined Segregation of Duties (SoD) rules** (analyst ≠ approver, submitter ≠ approver), multi-level approval routing, and immutable audit trail — compliant with KYC/AML regulations.
- **Designed 8 versioned REST API endpoints** with idempotency keys, webhook integrations (KYC, bureau, core banking), and role-based access control (RBAC) matrix.
- **Modeled a comprehensive state machine** covering 15 application states — with distinct terminal states for OFFER_DECLINED, OFFER_EXPIRED, and DISBURSED to preserve regulatory auditability.

Global Supply Chain Visibility Platform — Enterprise Architect | *Logistics & Microservices Portfolio* *2026*

- **Designed an event-driven architecture** using the C4 Model (Context, Container, Component, Deployment), Apache Kafka, and containerized microservices.

- **Delivered 15 enterprise diagrams** covering IoT sensor telemetry, carrier webhook ingestion, customs API integration, and real-time control-tower dashboards.
- **Specified NFRs** for 99.99% availability, 10,000 events/sec throughput, < 500 ms end-to-end latency, and eventual consistency via Kafka.
- **Engineered resilience** using the Circuit Breaker pattern, idempotency keys, and multi-region deployment on AWS (EKS, MSK, RDS, ElastiCache).

EDUCATION

Bachelor of Science in Information Systems | *Faculty of Computers & Information — Mansoura University, Egypt* *2026*

Focus: Business Analysis, Systems Design, and Requirements Engineering

Relevant Coursework: Systems Analysis & Design · Database Management Systems · Software Engineering · Business Process Modeling · Requirements Engineering

CERTIFICATIONS & CONTINUOUS LEARNING

- **IIBA Entry Certificate in Business Analysis (ECBA)** — In Progress (Expected 2027)
- **Google Project Management Professional Certificate** — In Progress
- **Continuous Learning** — Self-directed study in BPMN 2.0 Method & Style, C4 Model, Event-Driven Architecture, and REST API Design
